Competition Format and Rules

경기방식 및 규정 / Format et règlement des compétitions As of THU 25 JAN 2018

OLYMPIC COMPETITION FORMAT

Figure skating comprises five events at the PyeongChang 2018 Olympic Winter Games - men's single skating, ladies' single skating, pair skating, ice dance and the team event.

Men's single skating, ladies' single skating and pair skating

Men's single skating, ladies' single skating and pair skating consist of the short programme and free skating.

The top 24 single skaters and the top 16 pairs in the short programme, qualify for the free skating.

The duration of the short programme for all three events is a maximum of two minutes and 40 seconds +/- 10 seconds. The duration of men's single skating and pair skating free skating is four minutes and 30 seconds +/- 10 seconds, for ladies' single skating free skating it is four minutes +/- 10 seconds. A total of 60 individual skaters (30 ladies and 30 men) and 20 pairs are expected to enter the competition. There is a possibility to add one skater or pair in each event, to reach 31 or 21 entries, if the host country does not qualify through the International Olympic Committee (IOC) - International Skating Union (ISU) qualification system.

Ice dance

Ice dance consists of the short dance and the free dance.

The top 20 couples in the short dance qualify for the free dance.

The prescribed rhythms for the short dance are decided by the ISU.

The duration of the short dance is two minutes and 50 seconds +/- 10 seconds; for the free dance it is four minutes +/- 10 seconds. A total of 24 ice dance couples are expected to enter the competition. There is a possibility to add one couple in the event, to reach 25 entries, if the host country does not qualify through the IOC-ISU Qualification (see the below Host country solution).

Host country

If the host ISU member went through the normal qualifying procedure and did not qualify in any of the disciplines, the host ISU member shall have the right to enter one competitor per concerned discipline(s) as additional entry(ies) as long as the concerned skater(s)/pair/couple achieved the minimum total element score for the Olympic Winter Games, and there are additional places available out of the 10 places for the completion of a team (see Team event below).

The host ISU member solution does not apply for the team event.

Team event

The team event comprises 10 teams.

The teams may enter or finish the competition with the competitors in at least three of the four categories men's single skating, ladies' single skating, pair skating and ice dance.

Qualification consists of a short programme/short dance.

After the qualification a team will be allowed to replace up to two skaters/couples.

Teams are awarded 10 to one team points for the first team segment (first place, 10 points; 10th place, one point).

Qualification standing is set according to the sum of the team points.

The top five (including all tied for fifth place) qualify for the final.

The final consists of a free skating/free dance.

In the final phase, teams are awarded 10 to six-x (x = number of teams qualified over five) team points for each category (first place, 10 points, fifth place, six points, if more than five teams qualified: five points for sixth place, etc).

The final standings are set according to the sum of the team points achieved in the qualification and the final.

The duration of the short programme for ladies' single skating, men's single skating and pair skating is a maximum of two minutes and 40 seconds +/- 10 seconds.

The duration of the short dance is two minutes and 50 seconds +/- 10 seconds.

The duration of free skating for men's single skating and pair skating is four minutes and 30 seconds +/- 10 seconds, for ladies' single skating and free dance it is four minutes +/- 10 seconds.

DIFFERENCES BETWEEN THE ISU WORLD CHAMPIONSHIPS AND THE OLYMPIC WINTER GAMES

There are more restrictive qualification criteria for the Olympic Winter Games.

CHANGES SINCE THE SOCHI 2014 OLYMPIC WINTER GAMES

Host country participation

In the case where the host country, the Republic of Korea (KOR), went through the normal qualification procedure and did not qualify for any or only for some of the individual events (ladies' single skating, men's single skating, pair skating, ice dance), Rep.Korea will be allocated one host country place for the individual event(s). This means that the host country places would apply, if applicable, for one skater in ladies' single skating and/or one skater in men's single skating and/or one pair skating couple and/or one ice dance couple for a total maximum host country places of six skaters. The nominated skaters using the host country places will compete as No.31 in the men's single skating /ladies' single skating events, pair No.21 in the pair skating event or as couple No.25 in the ice dance event. The nominated skaters using the host country places must have the minimum eligibility standard set for all other skaters at the PyeongChang 2018 Olympic Winter Games, in particular, but not limited to, having achieved in due time the minimum total elements scores determined and published by the ISU.

SPORT RULES AND PROCEDURES

Start order for individual, pairs and ice dance events

For each event a separate initial draw will be held two days before the event. The draws for the start order of the short programme/short dance are made publicly available by the referee two days before the start of each event. The draw start order for the short programme/short dance is based on the current ISU world standings. The draws for the free skating are held after the short programme. Draws for the free dance are held after the short dance.

Start order for the team event

Each team will comprise one man, one lady, one pair and one ice dance couple selected from among entered skaters, substitutes, or the 10 non-qualified skaters, which are available to complete a qualified team. The teams may enter or finish the competition with competitors in three of the four categories.

The start list for the short programme/short dance of each category of the team event will be set in the reverse order of the ISU world standings of that category. The start list for the free skating/free dance will be set in the reverse order of the ranking in the short programme/short dance of that category.

ISU judging system for figure skating and ice dance

1) Event officials

Each discipline is managed by a referee.

The three main officials who monitor the competition and keep track of the programme elements performed by the skaters are the technical controller, the technical specialist and the assistant technical specialist.

Technical specialist

The technical specialist identifies the elements the skater is performing in real time and the level of difficulty of the element, if applicable. The level of difficulty of certain elements is defined by the ISU judging system. The work of the technical specialist allows the judges to concentrate on marking the quality of each element in the skater's programme. All technical specialists are former national and international skaters or coaches and are involved in skating on a weekly basis.

Technical controller and assistant technical specialist

The technical controller and assistant technical specialist support the technical specialist to ensure that any potential mistakes are corrected immediately. In the case of a difference of opinion, the majority decision by the technical specialist, technical controller and assistant technical specialist will be used. Each of these individuals will be monitored through an audiotape and videotape recording of the competition.

The technical controller supervises and corrects, if necessary, the call of the technical specialist and the input of the names and correct levels of difficulty of performed elements. However, if both technical specialists disagree with the correction, their initial decision stands.

Judges

Under the ISU judging system, the judges focus entirely on scoring the quality of each element and the quality of the programme components. Their marks will be based on specific quality criteria for each element and will provide a comprehensive assessment of each skater's skills and performance.

A judge is not required to compare and score each skater directly in relation to all other skaters. This permits each judge to focus on the quality of: (1) each performed element, and (2) the program components, and to enter their scores into a touchscreen. The computer records the individual scores as entered by the judges and compiles aggregate scores for each skater to determine the final rankings.

There will be a panel of nine judges and their scores are used to form the result for each segment. The judges will be drawn for each segment 45 minutes the segment. For the first segment of the individual events in men's single skating, ladies' single skating, pair skating and ice dance, nine judges will be drawn from a total of 13 judges.

For the second segment of the event, the four judges not drawn for the first segment will automatically be assigned to be in the panel of nine judges for the second segment and all other judges serving already in the first segment will participate in the draw to complete the panel of nine judges for the second segment. Out of the nine judges drawn for each segment, the highest and lowest scores are deleted and the average will be taken from the remainder (trimmed mean).

2) Technical score

Every required element of the short programme, free skating, short and free dance is assigned a base value. Base values of all recognised elements are published annually by the ISU in the scale of value chart.

During the programme, judges will award a Grade of Execution (GOE) within a range of plus-three to minus-three to each element performed.

The panel's GOE is determined by calculating the trimmed mean of the numerical values of the GOEs awarded by a maximum of nine scoring judges. The trimmed mean is calculated by deleting the highest and lowest scores and calculating the average of the remaining scores (maximum of seven). This average will become the final GOE of an individual section/element (rounded to two decimal places).

The panel's score for each element is determined by adding the trimmed mean GOE of this section/element to its base value.

The panel's scores for all the sections/elements are added to give the total technical score.

3) Presentation scores (programme components)

In addition to the technical score, the judges will award points on a scale from 0.25 to 10 (in increments of 0.25) for the program components to grade the overall presentation of the performance. These programme components are skating skills, transitions, performance, composition and interpretation of the music (for men's single skating, ladies' single skating and pair skating) or interpretation of the music/timing (for ice dance). Several factors, as detailed below, are to be taken into account when the judges consider each component.

The panel's score for each programme component is reached by calculating the trimmed mean of the scoring judges' results for that programme component. The panel's scores for each program component are then multiplied by a set factor to ensure that the total element score and programme component score are balanced and the results are rounded to two decimal places.

The skater's/pair's/couple's whole performance is evaluated by five programme components: Skating Skills, Transitions, Performance, Composition, Interpretation of the Music/Timing (for Ice Dance).

For pair skating and ice dance there must be equal demonstration of the criteria by both skaters.

Skating skills

Defined by overall cleanness and sureness, edge control and flow over the ice surface demonstrated by a command of the skating vocabulary (edges, steps, turns and so on), the clarity of technique and the use of effortless power to accelerate and vary speed.

In evaluating the skating skills, the following must be considered:

- Use of deep edges, steps and turns
- Balance, rhythmic knee action and precision of foot placement
- Flow and glide
- · Varied use of power, speed and acceleration
- Use of multi-directional skating
- Use of one foot skating

Transitions

The varied and purposeful use of intricate footwork, positions, movements and holds that link all elements.

In evaluating the transitions, the following must be considered:

- Continuity of movements from one element to another (all disciplines)
- Variety (including variety of holds in ice dance)
- Difficulty
- Quality

Performance

Involvement of the skater/pair/couple physically, emotionally and intellectually as they deliver the intent of the music and composition.

In evaluating the performance, the following must be considered:

- Physical, emotional, intellectual involvement and projection
- · Carriage and clarity of movement
- · Variety and contrast of movements and energy
- Individuality/personality
- Unison and "oneness" (pair skating, ice dance)
- Spatial awareness between partners management of the distance between skaters and management of changes of hold (pair skating, ice dance).

Composition

An intentionally developed and/or original arrangement of all types of movements according to the principles of musical phrase, space, pattern and structure.

In evaluating the composition, the following must be considered:

- Purpose (idea, concept, vision, mood)
- Pattern/ice coverage
- Multi-dimensional use of space and design of movements
- Phrase and form (movements and parts structured to match the musical phrase)
- Originality of the composition

Interpretation of the music/timing (for ice dance)

The personal, creative and genuine translation of the rhythm, character and content of music to movement on ice.

In evaluating the interpretation of the music/timing, the following must be considered:

- Movement and steps in time to the music/timing
- Expression of the music's character/feeling and rhythm, when clearly identifiable
- Use of finesse* to reflect the details and nuances of the music
- Relationship between the skaters reflecting the character and rhythm of the music (pair skating, ice dance);
- Skating primarily to the rhythmic beat for short dance and keeping a good balance between skating to the beat and melody in the free dance (ice dance).

*Finesse is the skater's refined, artful manipulation of music details and nuances through movement. It is unique to the skater/skaters and demonstrates an inner feeling for the music and the composition. Nuances are the personal ways of bringing subtle variations to the intensity, tempo and dynamics of the music made by the composer and/or musicians.

4) Final scores

4.1) Individual, pairs and ice dance events

The final score is calculated by adding the total element score and the factored programme component scores and subtracting any programme deductions (e.g. falls, time violation, illegal elements, and so on) The scores of the short programme/short dance and free skating/free dance are added and the result constitutes the final score of a skater or couple in an event. The participant or couple with the highest total score wins. In the case of a tie in any phase, tie-break rules will apply.

4.2) Team event

The team points will be awarded according to the placement of the skaters/couples in each category as follows:

- Short programme/short dance: first place, 10 points; 10th place, one point
- Free skating/free dance: first place, 10 points; fifth place, six points, if more than five teams qualified: five points for sixth place, etc.

The final standings in the team event will be determined by the total team points achieved in both segments. The final standings for those teams that did not qualify for the free skating/free dance will be determined by the team points achieved in short programme/short dance.

Tie-break rules

Individual, pairs and ice dance events

Segment

If two or more skaters, pairs or ice dance couples have the same rank, the total technical score will be used to break ties in the short programme/short dance. The programme components score will be used to break ties in the free skating/free dance. If these results do not break the tie, the competitors concerned will be considered tied.

Event

If two or more skaters, pairs or ice dance couples have the same rank after the combined result or the final result, the highest score in the last skated segment will be used to break ties. If there is a tie in the highest score of the last skated segment, the better placement will decide upon the better place. If the last skated segment is tied, the placement of the previously skated segment will be used to break ties, etc. If there is no previous segment, skaters, pair or ice dance couples will be considered tied.

Team event

Segment

If two or more skaters, pairs or ice dance couples have the same rank in the short programme or short dance, the total technical score will be used to break ties. If two or more skaters, pairs or ice dance couples have the same rank in the free skating or free dance, the programme components score will be used to break ties. If these results do not break the tie, the competitors concerned will be considered tied. The team points will be awarded according to the placement of the skaters/couples in each category.

강릉 아이스 아레나 Palais des glaces de Gangneung

Event

In cases of ties between teams, the following tie-breaking procedure will be used:

The highest total team points from the two best places will break the ties

- If they remain tied, the highest total segment scores of the current segment of the two best places according to the team points will break the ties.
- If they remain tied, the highest total team points from the three best places will break the ties.
- If they remain tied, the highest total segment scores of the current segment of the three best places according to the team points will break the ties.
- If these criteria fail to break the ties, the teams will be considered as tied.
- If the teams are tied for a qualifying place all tied teams will qualify to the final.

Penalties/disqualification rules

The penalties and disqualifications are managed by the ISU rules.

Protests/appeals

Any protest must be addressed to the event referee.

Item: 1

Revised Team Event Result after Pair Skating Free Skating

After the Team Event Pair Skating Free Skating the Team Event Result had to be revised for places 8 - 10 as the sort order was alphabetical and not considering the tie-breaking criteria.

Item: 1

Clarification on outfit for Team Event Venue Ceremony

Please note a CHANGE in the uniform guidelines for the venue ceremony for figure skating team event on Monday, February 12, 2018: Instead of their competition suit, the athletes will have to wear their NOC track suit with their skates. This is agreed with ISU and arrangements will be also made with the NOC's.

Issued by: ISU Technical Delegates

Time: 7:56

Date: 11 FEB 2018

Ladies Short Program: Score for TURSYNBAEVA Elizabet (KAZ)

After careful consideration and review by the Referee and the Technical Controller the element number 3 (3S+3T) for the skater TURSYNBAEVA Elizabet (KAZ) was evaluated in favor of the skater as executed right on the boarder of the 2nd half of the program and therefore the 1.1 bonus for this element has been awarded and the score has been adjusted accordingly. The short program score changes from 57.95 to now 58.82. This change of score has no influence on the ranking.

Issued by: ISU Technical Delegate and Event Referee

Time: 16:06

Date: 21 FEB 2018
